HOW TO
REMEMBER
THE 99
NAMES OF
DIVINITY

INTRODUCTION TO MNEMONICS

وَلِلّٰهِ الْأَسْمَاءُ الْحُسْنَىٰ فَادْعُوهُ بِهَا

"Allah's are the best of names, so call on Him thereby." 7:180

The 99 names of Allah (Asmaul Husna) can be memorised in sequence using the Link system.

The Link system of memory is designed to enable one to remember any number of things in sequence.

The process is divided into three stages:

1. Encoding the elements of information into visual images as image information is far easier to memorise than textual information.
2. The memorisation process itself.
3. Remembering the sequence of information.

Mnemonics (pronounced ne-monik) is a memory aid in the form of a word, phrase or story. It is derived from a Greek word 'mnemonikon' – an art of memorisation.

For example, most of us are able to remember the colours of the rainbow by using a mnemonic such as 'Richard of York gave battle in vain'.

Here the initial letters of the seven words give us the colours: red, orange, yellow, green, blue, indigo and violet.

This example demonstrates two elements of memorisation: imagination and association.

Thus, you create a sentence (imagination) using words starting with the initial letters of the colours (association). Aristotle wrote, as the first sentence of one of his books, "In order to think we must speculate with images."

The 99 names have been divided into 11 sections to allow easy memorisation.

The first step is to create focus points or 'pegs' for each section on which we can 'hang' the story mnemonics.

On the following pages you will find the focus points and the corresponding story mnemonics.
